

ENERDATA sas recruits its future Director of Studies, whose responsibilities will be the following:

- Coordinate the work of the two operational departments under his/her executive responsibility: modelling department and analysis department. Secure a progression of the turnover of the business unit « Studies » in line with the business plan of the company
- Ensure an adequate programming of the studies, compatible with Enerdata's endogenous resources and with a good management of the company
- Guarantee the relevance, scientific quality and punctuality of studies deliverables
- Maintain a research effort in analytical and modelling tools
- Promote Enerdata's image and notoriety towards all stake-holders of the energy scene in France and internationally

For this purpose, the future Enerdata's Director of Studies must have the following qualities:

- At least 15 years of professional experience
- Confirmed experience in a consulting bureau specialised in economic issues related to energy
- Acquainted in general economic issues related to energy, with a specific expertise in energy statistics, energy modelling / forecasting / foresight and energy efficiency evaluation
- Demonstrated capacity in team management
- Benefitting an international experience (international clients, employment in foreign country,..) and totally fluent in English
- Speak French

The job will be based in France (Grenoble).

To apply to this offer, please send us your application by email to job@enerdata.fr with a CV and a cover letter.
