

The Centre for European Economic Research (ZEW) Mannheim, Germany, is a non-profit economic research institute and works in the field of applied empirical economic research. The institute pursues a microeconomic and microeconomic course of research and is integrated into a dense national and international network of universities and research institutes.

Its **Environmental and Resource Economics, Environmental Management** research department is recruiting

# Junior and Senior Researchers

One focus of the scientific work will be the development and the application of theory-based quantitative models for environmental policy analysis based on the general equilibrium theory. A further focus will be the application of econometric, particularly microeconomic, or experimental methods on environmental issues.

The successful applicants will have an honours degree in economics and a strong interest in theoretically based empirical analyses pertaining to environmental economics. A profound knowledge of microeconomics is prerequisite, a knowledge of environmental economics would be an advantage. The positions are suitable for both graduates and postdocs with a PhD in a related field.

We are offering the opportunity to undertake challenging work as part of a motivated research team. Extensive contacts within our national and international research network as well as international co-operations offer attractive future career prospects for the successful candidate. Remuneration is based on the TV-L statutory salary scale and its associated public sector benefits. Continuing qualification in the context of postgraduate doctorates is explicitly supported, e.g. by granting periods of paid release from normal project work and by facilitating fellowships at renowned research institutions abroad.

Please send your application quoting the reference code: "Conf-Env-09".
